- 1) microsoft is a monopoly, if you couldn't prove that ...
  - 2) the judge who got thrown off the case was right about his categorization of microsoft and bill gates
  - 3) If you let microsoft "contibute" to underpriviledge schools, take the billion and let the schools decide for themselves what they want to buy with it. don't let microsoft copy there own software and give it away.
  - 4) What i've learned from this case is break the law and get richer before and after cause the government can't or won't do anything to stop a billion dollar company.
- Finally, how much money was wasted on this case to simply let microsoft get away with it and even get to strengthen their monopoly on top of it.
